Agenda Item 6

Holmewood Gardens Park Management Plan – Proposed Vision statement.

Holmewood Gardens Park Vision

The park is the integral, central green space of the Victorian residential historic square of Holmewood Gardens.

It is a good example of a heritage urban landscape; an attractive, small public park, containing a variety of established planting and trees in a natural setting.

Situated within an area that is primarily residential, it acts as a shared, friendly, welcoming social hub for all members of the community.

It is inspiring, feels safe and is highly maintained and cared for. It is well regarded and appreciated by the surrounding neighbourhood to which it is intimately and harmoniously connected.

The park's natural habitat is supported; its biodiversity encouraged, and it succeeds as a vital, flexible, inclusive leisure location that accommodates an expanding range of play and informal activities.
